

PROVIDE INPUT ON NEIGHBORHOOD DRAINAGE SOLUTIONS

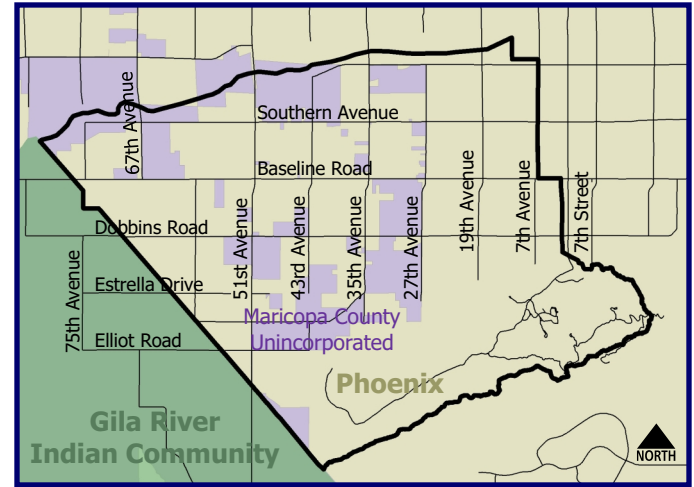

Laveen Area Drainage Master Plan Update

The Flood Control District of Maricopa County in partnership with the City of Phoenix is conducting the Laveen Area Drainage Master Study/Plan Update. The purpose of this study is to identify flooding problems in the area, and if needed, update the previous drainage master plan and propose any new drainage solutions for the area.

In 2015, public meetings were held in response to the summer storms of 2014 and input was received from area residents on the known flooding problems.

Receive results of drainage study

Please attend one of two upcoming public meetings, where you will learn study results and have the opportunity to give input on the potential alternative solutions.

Map not to scale.
